

**Report
Of
DATA ANALYTICS ESSENTIALS CERTIFICATION**

Submitted
To
School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

As a record of a self-paced certification course completed
in addition to the B.Tech CSE curriculum

By
Roll Number of Student: 25SCS1003004185
Name of Student: NIKHIL KUMAR
Batch: 2024-28

2026-27

CANDIDATE'S DECLARATION

I, Nikhil Kumar, do hereby declare that this report titled “Data Analytics Essentials Certification” presents a genuine account of the self-paced certification course completed by me through IILM University via the Cisco Networking Academy program. All references have been quoted and I have not taken as such any material from any other source without acknowledgement. I affirm that this report is my own work.

Signature: _____

Student Name: NIKHIL KUMAR

Roll No.: 25SCS1003004185

ACKNOWLEDGEMENT

I would like to express my gratitude to IILM University and the Cisco Networking Academy for providing access to the Data Analytics Essentials course as part of a structured, self-paced learning opportunity.

I am thankful to Ms. Swati Vashisht, Instructor, IILM University, for the guidance and course materials that supported this certification.

I also thank my family for their continued encouragement.

Signature: _____

Student Name: NIKHIL KUMAR

CERTIFICATE OF COMPLETION

Certificate awarded to Nikhil Kumar for successfully completing Data Analytics Essentials, offered by IILM University through the Cisco Networking Academy program, completed on 14 June 2026. Certificate ID: c006f4b7-6ed2-4d1e-9049-5028cefd0f0e.

1. INTRODUCTION

This report presents a record of the Data Analytics Essentials certification completed through IILM University in association with the Cisco Networking Academy program. The course was undertaken as a self-paced, supplementary certification alongside the regular B.Tech Computer Science and Engineering curriculum, with the aim of building a foundational understanding of data analytics concepts and tools.

Data analytics has become a foundational skill across technical disciplines, involving the process of gathering, cleaning, analyzing and visualizing data to support decision-making. The Data Analytics Essentials course introduces this process end-to-end, covering spreadsheet-based analysis in Excel, structured data querying using SQL, and data visualization using Tableau, alongside foundational statistical concepts and a module on ethics and bias in data.

This report documents the course structure, the tools and concepts covered, and the certification received upon completion, along with the outcomes gained from the course.

2. PROGRAM PROFILE

The Data Analytics Essentials course is offered by IILM University through the Cisco Networking Academy (NetAcad) program, a global education initiative run by Cisco Systems that provides free, self-paced technical courses. The course was completed under the instruction of Ms. Swati Vashisht, Instructor, IILM University.

The course is structured as a beginner-level, self-paced online program consisting of ten modules and a series of hands-on labs, concluding in a comprehensive assessment. A passing score on this assessment is required to earn the course completion badge and certificate.

3. OBJECTIVES

- To understand the end-to-end data analytics process, from data gathering to insight generation.
- To learn how to gather, clean and prepare data for analysis.
- To apply basic statistical techniques to analyze data.

- To learn spreadsheet-based data analysis using Microsoft Excel.
- To understand relational databases and query data using SQL.
- To learn data visualization and dashboard creation using Tableau.
- To understand ethical considerations and sources of bias in data analytics.

4. SCOPE OF THE CERTIFICATION

The scope of this certification is defined by the ten-module Cisco Networking Academy curriculum, covering data analytics fundamentals, data preparation, statistical analysis, relational databases and SQL, data visualization using Tableau, and the ethical dimensions of working with data. Hands-on labs using real datasets were included throughout the course to reinforce conceptual learning with practical application.

5. TECHNOLOGIES AND TOOLS USED

Table 5.1 summarizes the core tools used throughout the Data Analytics Essentials course.

Table 5.1: Technologies and Tools Used

Tool	Purpose in the Course
Microsoft Excel	Transforming, organizing and visualizing data using spreadsheets, pivot tables and functions such as VLOOKUP.
SQL	Querying data from relational databases using structured queries.
Tableau	Building dashboards and visualizations to communicate data insights.

6. COURSE CURRICULUM

Table 6.1 presents the module-wise structure of the Data Analytics Essentials course, as completed.

Table 6.1: Course Curriculum (Module-wise)

Module	Topic
Module 1	Data Analytics Projects
Module 2	Getting Started with Data Gathering and Investigation
Module 3	Preparing and Cleaning Data for Analysis
Module 4	Preparing and Cleaning Data for Analysis (continued)
Module 5	Analyze the Data Using Statistics
Module 6	Introduction to Relational Databases and SQL
Module 7	Introduction to Structured Queries
Module 8	Introduction to Tableau
Module 9	Ethics and Bias in Data
Module 10	Take the Next Steps

7. METHODOLOGY

The course was completed through Cisco Networking Academy's self-paced online learning platform. Each module combined conceptual instruction with hands-on labs using real datasets (including sample bike sales, game purchase and movie datasets), followed by a module-level quiz to reinforce understanding.

The course concluded with a comprehensive final assessment; a minimum passing score of 70% was required to earn the completion badge and certificate.

8. OUTCOMES

- Developed a broad understanding of how the data analytics process creates value from data.
- Learned to identify data characteristics, formats and acquisition methods.
- Gained practical experience transforming and preparing data for analysis.
- Applied basic statistical techniques to analyze datasets.
- Learned to query relational databases using SQL.
- Built data visualizations and dashboards using Tableau.
- Developed awareness of ethical considerations and bias in data analytics.
- Successfully completed the course, earning the Data Analytics Essentials certificate (Certificate ID: c006f4b7-6ed2-4d1e-9049-5028cefd0f0e).

9. CERTIFICATE OF COMPLETION

A copy of the certificate awarded upon completion of this course is included in this report (see certificate page, inserted after the Table of Contents). The certificate confirms successful completion of Data Analytics Essentials, offered by IILM University through the Cisco Networking Academy program, awarded to Nikhil Kumar on 14 June 2026, under Certificate ID c006f4b7-6ed2-4d1e-9049-5028cefd0f0e.
